

MYGUIDE 6.0

NAVIGATION SOFTWARE

DOOR-TO-DOOR NAVIGATION ACROSS EUROPE

Easy-to-use, one hand operable finger-friendly user interface

Learning how to use the MyGuide 6.0 GPS Navigation software is quick and easy. Any function or setting can be accessed through not more than one or two screen taps, wherever you are within the program. Use the built-in intelligent search function to enter a specific address or to select any of your saved destinations or POIs. It only takes a couple of seconds to put together your individual, customized route plan with multiple waypoints across Europe. From this moment on, MyGuide 6.0 will automatically guide you door-to-door.

Plug & Go

- One minute and it's ready to cruise!
No need for installation or for registration via the internet. Simply insert your MyGuide memory card, and you are ready to cruise!
- Easy-to-use menu
Select any address, a point of interest or one of your favorite destinations quick and easy by using the one hand operable finger-friendly touch screen.
- Detailed, high-quality maps of Europe
The latest digital maps are now installed on a 1GB memory card as one seamless map. Plan your trip defining multiple destinations across Europe without downloading maps.
- Voice prompted turn-by-turn guidance
In addition to the spectacular 2D and 3D map views, you may also rely on the multilingual male or female voice navigator.
- Multipoint route planning with optimization
Using the intelligent address search feature, it only takes a couple of seconds to put together your route plan, which may consist of any number of waypoints across Europe.
- Automatic rerouting using the "Avoid" function
When you take a detour from the route you originally specified, MyGuide 6.0 will automatically reroute it for you. Use the "Avoid" feature to exclude roadblocks or traffic jams.
- Personal routes and POI data
The path you are driving may be saved, then displayed on the map, or played back at any time later. Your favorite destinations may be grouped and stored on your own lists.

Multipoint route planning

Plan your trip by defining multiple destinations using the quickest, shortest or most economic routing. While driving, you may decide to use the spectacular 2D and

3D map views or may rely on precise voice messages. If you leave the original route, MyGuide 6.0 will automatically re-route it for you. Use the "Avoid" feature to exclude roadblocks or traffic jams from your route.

Detailed maps of Europe (on 1GB SD memorycard)

MyGuide 6.0 contains street level maps of European cities. Expanding the newest Western European maps with 8 countries of the Eastern European region, MyGuide 6.0 shows you the real size of Europe. This truly detailed map comes complete with a database of thousands of points of interests (POIs). These include the addresses of gas and service stations, ATMs, shopping malls, hotels, and restaurants. The database gives you the option to search POIs by name, type, or distance.

Interactive 2D and 3D

MyGuide 6.0 GPS navigation software is developed with technological innovations. One of them is the super-intelligent map zoom and tilt system, which automatically and gradually zooms in and tilts the map as you approach the next turn, just to make sure that you can easily envision the maneuver ahead of you.

Automatic day/night mode switching and more.

MyGuide offers several features designed to improve your level of comfort. The program automatically switches between the day and night modes in accordance with the current times of sunrise and sunset – and, regardless of the operating system, the portrait and landscape screen modes work on all compatible devices.

High resolution VGA mode and different color styles

High resolution VGA mode and improved user interface gives you the visual experience of traditional paper maps on a TFT screen. Different color styles let you personalize the look and feel of the maps.
